## 11+ Mathematics - Sample Paper.

You have 35 minutes to complete this paper.

Q 6. In a local sweet shop there 360 boxes of Belgian Chocolates. 48 are given away as prizes in a special Valentine's prize drawer. 192 are sold to the public at $£ 4.60$ a box.

How many boxes remain unsold? $\qquad$

Q 7. Alexander's grandma is 5 times as old as Alexander was 3 years ago.
If Alexander's grandma is 60, how old is Alexander? $\qquad$

Q 8. This shape has been created using two identical isosceles triangles.

What is the angle at point $B$ ? $\qquad$。

Q 9. Mr and Mrs Fitzgerald take their 3 children to a special pop concert. Tickets cost $£ 7.00$ each for adults. The price of a child's ticket is half that of an adult's.

How much does it cost the family to visit the theme park?
£ $\qquad$

Q 10. This is Sandra's function machine.

What number did she start with? $\qquad$

Q 11. This spinner has an equal chance of landing on any of the numbers.

What is the chance that it will come to rest on a number that is a multiple of 6 ?

Write your answer as a fraction in its lowest possible terms. $\qquad$

Q 12.
Find the missing number so that the equation balances.

$$
8 \times 9-16=7 \times 5+
$$

Q 13. Colin has six 50 pence pieces, two 20 pence pieces, two ten pence pieces and five 5 pence pieces in her pocket.

How much money does he have in total?
£ $\qquad$

Q 14. Which one of the following numbers is a factor of 2,5 and 6 ?
Circle the appropriate answers.

| 20 | 35 | 40 | 55 | 60 |
| :--- | :--- | :--- | :--- | :--- |

Q 15.
A box contains 2 blue pencils, 3 green pencils and 4 red pencils.
If I pick a pencil from the box at random (with my eyes shut), what is the probability that I will pick out a green one?

Circle the appropriate answer.
A. $2 / 7$
B. $1 / 3$
C. $1 / 5$
D. $1 / 4$
E. $2 / 5$

Q 16.

Roger places some weights on an electronic scale. He needs to make a total of 5.5 kg .
Which two of the weights below should he choose to make up the weight to the correct amount?
Circle the two appropriate letters.
625 g
750 g
B

C

D
500g
E

Q 17. This half term Martin has taken 7 tables tests. Here are his results out of 10:
$\begin{array}{lllllll}8 & 5 & 9 & 4 & 6 & 4 & 8\end{array}$

What was his median score?

Q 18. Calculate the following:

$$
15000 \div 100=
$$

$\qquad$

Q 19. What fraction of a hour is 12 minutes?
Write your answer in its lowest possible terms.

Q21. The ratio of flour to sugar in a cake is $7: 4$.
If 200 g of sugar was used to make the cake, how much flour was used?
$\qquad$

Q 22-23. Look at the Venn diagram below. It shows how many children in Mrs Thompson's class like chocolate, ice cream or both. 2 children like neither. There are 32 children in the class.

If 26 children like chocolate and 20 like ice cream:

Q 22. How many children in the class do not like chocolate? $\qquad$
Q 23. How many children only like one flavour? $\qquad$

Q 24. Smoked Salmon crisps cost 47p per packet.
Sophie bought 5 packets for herself and her friends.

How much change would Sophie get from a $£ 5$ note?
£ $\qquad$

Q 25. There are 12 sticks of "Minty Fresh" chewing gum in a pack.

How many packs could you make from 216 sticks of gum? $\qquad$ packs

Q 26. The local book shop has a sale.
Every item in the shop is reduced by $25 \%$.
Melanie buys a set of encyclopaedias.
The set normally costs $£ 30.00$.
How much does Melanie have to pay for the books in the sale?
£ $\qquad$

Q 27. In the same book shop Melanie's little brother, Robert, bought a picture book for $£ 1.50$.

What was the price of the picture book BEFORE the sale started?
$£$ $\qquad$

Q 28. How many faces has a octagonal prism?
$\qquad$

Q 29 - 30.

Q 29.
What are the co-ordinates of the points at letter $U$ and letter $S$ ?
U $\qquad$ , $\qquad$

S $\qquad$ , $\qquad$

Q 30. If you joined the points in alphabetical order, then back to $S$, what shape would you have drawn? $\qquad$
1.
